Advertyzement Assignment

APRIL 2021

This doc consists of 3 assignment questions and the instructions to do and submit it.

Doing all of them is compulsory.

How to Submit

Once done, create a GitHub repository and share the link with us. This repository should contain a readme file describing the method you have used to solve the problem.

Let us know if you have any doubts regarding the assignment.

Note : these assignments are designed purely for the evaluations purpose and any part of your submission won't be used in the actual product we are working on.

Assignment 1

Create a web application using create-react-app:

1. Create a User card grid layout having navbar showing any brand name

2. Add a button in the navbar saying 'Get Users', which makes an API call to get the user data

3. Use https://reqres.in/api/users?page=1 to get the data

4. Show a loader while the API fetches the data.

5. Use custom CSS/SASS/styled-components whichever you feel comfortable, but no CSS framework.

6. Bonus points for clean code

You can design your own UI for this, make it simple.

Assignment 2

Make a clone of this zoomcar website:

1. Link: https://www.zoomcar.com

2. Clone only Homepage

3. Use HTML, CSS and Vanilla JavaScript for creating the UI and functionality

4. Don't use any CSS frameworks

5. Bonus points for clean code

Assignment 3

Make a drag and drop UI as seen in the GIF:

1. Use HTML, CSS and vanilla JavaScript for creating the UI and functionality

2. Bonus points for clean code

3. Link to gif: https://drive.google.com/file/d/17LBgnx6PAYGseJqvFM3MZLzn6RfaZwTm/view
